Profile

Frontend Engineer with 6+ years of experience building production applications with React, Next.js, and TypeScript. Experienced in SSR, reusable component libraries, API integrations, and debugging complex frontend issues. Comfortable owning features independently and collaborating across teams.

Core skills

Frontend: JavaScript, TypeScript, React, Next.js, Tailwind CSS, responsive design
State and data: Redux, TanStack Query (React Query), REST APIs, GraphQL
Testing and delivery: Jest, Vitest, Cypress, React Testing Library, Git

Experience

EPAM Systems - Frontend Engineer Jun 2024 - Aug 2026

Cosmetics e-commerce platform

- Developed production features using Next.js, React, TypeScript, and shadcn/ui for a regional e-commerce platform.
- Independently implemented wishlist functionality from scratch based on Figma designs, including responsive UI components.
- Collaborated with frontend and backend engineers on user settings, authentication-related interfaces, and API integrations.

Education platform

- Developed and maintained production features using React, Next.js (App Router), and TypeScript, including reusable UI components and server-rendered pages.
- Implemented frontend features, redesigned product search interfaces, and integrated UI functionality with existing services, including Algolia.
- Worked across Next.js and Adobe Experience Manager (AEM), building components, updating pages, and resolving production issues such as hydration mismatches and rendering bugs.

Insurance platform - shared UI library

- Developed and maintained a shared React component library using TypeScript, Next.js, Tailwind CSS, and Yarn Workspaces.
- Built reusable, theme-aware components distributed as an npm package and integrated across multiple applications.
- Maintained consistent UI behavior across product themes, using AI-assisted workflows to streamline repetitive changes.

Independent Contractor - Frontend Developer May 2023 - Jun 2024

Built a commercial educational platform and independent products, including an expense tracker and a ChatGPT-based application, using React, Next.js, and TypeScript.

Sberbank - Frontend Engineer Dec 2020 - Apr 2023

Developed media, educational, and interactive products across three teams, contributing to code reviews, technical planning, and mentoring other engineers.

Triumph Group - Frontend Engineer Sep 2019 - Sep 2020

Developed browser-based CAD tools for garment design, working with Canvas, a custom WebGL-based 3D engine, and Google Polymer for 2D interfaces; mentored six developers.

Freelance & Independent Projects - Developer Jun 2018 - Jul 2019

Built a Telegram-based order fulfillment system with product catalogs, inventory tracking, and delivery management; developed browser games using TypeScript and Phaser.js, including a paid client project.

GMsite - Web Developer Jan 2018 - Jun 2018

Built and maintained websites using WordPress, Drupal, and Bitrix, including page layouts, content management, database exports, PHP modifications, and bug fixes.
